Infinity VUE Loupes

The ergonomic Infinity VUE loupes support posture and prioritize musculoskeletal health for improved clinician comfort and performance

In dentistry, ergonomics isn't just "nice to have." It's a "must-have" requirement that can directly impact a clinician's performance and career longevity. By investing in ergonomic solutions that support posture and prioritize musculoskeletal health, clinicians are investing in their careers.

"I rely heavily on products that improve my posture and ergonomics and allow me to continue practicing in this career that I love," Dr. Karen Guo shared. One such product, she said, is "the ergonomic Infinity VUE loupes from Designs for Vision, which have become indispensable in my everyday practice of general dentistry."

Because the loupes assist in "maintaining a neutral spine for a majority of my workday, they have been instrumental in decreasing chronic musculoskeletal dysfunction in my cervical and lumbar spine," Dr. Guo explained. "I noticed stark improvements in my musculoskeletal health."

Ergonomic Positioning: Posture and Comfort

The Infinity VUE loupes are designed with a "vision up" ergonomic angle that helps clinicians keep their chins up, necks straight, and eyes forward while working. "The most impactful facet of the Infinity VUE loupes is mitigating the downward flexion of my neck for prolonged periods of time," Dr. Guo said. "The refractive prism technology fosters an upright, non-forward bending neck posture that allows me to practice comfortably without experiencing significant pain by the end of the day," she explained.

"The Infinity VUE loupes are breathing life into my career and reducing my pain and discomfort by 95%," proclaimed Brittany Ashenfelter, LDH.

Describing the loupes as "a game changer," hygienist Amber Bonanni said, "It has changed my posture and eliminated the constant neck and back pain that we in the dental field experience far too often."

Dr. Craig Aebli said he noticed less stress and fatigue after wearing Infinity VUE. Dr. Hana Rashid experienced "corrected posture and much less pain and tension," and Dr. Alan Pressman shared, "I no longer need to see a chiropractor daily since my back and neck feel better."

"You have absolutely no choice but to sit upright with the Infinity VUE loupes," revealed Dr. John Horn, who noticed immediate improvements to his posture and back and neck pain and said it was "absolutely worth the effort to adapt to the loupes." Dr. Rick Adelstein said he "really liked the loupes after the learning curve of adjusting to them." Reporting improved posture, Dr. Sylvia Irwin said it took less than 3 days for her to adjust to the Infinity VUE design. "I am very impressed and will be recommending them to anyone who wants to listen," she shared.

Magnification, Visual Acuity, and Field of View

Available in 4 magnifications—3.0x, 3.5x, 4.0x, and 4.5x—Infinity VUE is customized for each clinician's measurements and working distance. Precision-coated optics, a patented lens technology/design, and high-definition imaging allow for crisp, clear visualization with no convergence

distortion or eye strain during procedures.

Praising the "visual acuity and field of view, which provide clear, accurate, and uncompromised visualization of my working field," Dr. Guo shared, "The sharp magnification and FOV allow me to examine, prep, restore, and extract with the precision, accuracy, and exceptional quality of care that my patients deserve."

Dr. Horn mentioned, "The sharpness and clarity of the field of view are impressive," and Dr. Steven Berk said, "The field of view was amazing." Dr. Hatem Abdelhadi observed, "The detail I was able to see in my preps was amazing."

Design and Customer Service

Infinity VUE loupes are available in cordless or corded models and in several frame styles. Bonanni "loved the variety of frames and color options," and Dr. Abdelhadi said, "The frames are high quality and comfortable." Periodontist Ravichandra Juluri praised the "light weight, good clarity, and many frame options" but would like the option for loupe laser inserts for the frame.

A dedicated representative from Designs for Vision assists clinicians with the entire purchase process, from measurements and fittings to education and adjustments. The company provides a 60-day free trial with each purchase.

Ashenfelter praised "the top-notch and absolutely seamless experience, from the ordering phase to the delivery process." Dr. Guo said her company rep "was communicative, knowledgeable, and easy to work with," and Bonanni said, "My rep ensured the field of view and working distance were set perfectly."

Overall Satisfaction

Explaining that Designs for Vision has been her workhorse loupe brand since dental school, Dr. Rashid said, "I have complete faith in the brand." Calling the company support "fantastic" and the

loupes "amazing," Dr. Philip Aurbach said the time spent adjusting to Infinity VUE "was 1,000% worth it."

"These loupes have changed and prolonged my dental career after 20 years of clinical practice," Ashenfelter shared. "I highly recommend Infinity VUE for students, faculty, and all clinical staff."

Dr. Horn concluded, "Infinity VUE is a 5-star product. If you have back or neck pain, these are the loupes for you."
